Search for internship in Software Development

Dear Sir/Madam,

Currently training in AFPA of Champs sur Marne (Software Developer professional qualification level 2), I am looking for a 2-month end-of-course internship beginning on 13 May 2019.

I am looking especially for projects in Java, but other languages are suitable. With a number of years in IT development (both back-end and front-end) I have practiced PHP, JavaScript, SQL, HTML and others. I am ready to quickly study the technologies used by your team to facilitate the beginning of an internship.

I offer you my analytic capacities, my knowledge in languages and IT technologies and my ability to learn and evolve non-stop, and hope very much you may be able to use them.

Yours faithfully

Yves HUGOT
